EXPERIENCE

Software Engineer

September 2025 – Present

CodeIgn

Lahore, Pakistan

HQCtrl (Multi-tenant ERP with AI Assistant)

- Built a scalable multi-tenant ERP using Next.js, Prisma, and PostgreSQL, implementing modular systems for employee management, attendance, leave, payroll, and organizational operations with robust role-based access control.
- Designed and integrated an AI Assistant using MCP (Model Context Protocol), enabling natural language actions such as employee queries, leave requests, attendance tracking, and business insights through custom tool orchestration.
- Developed end-to-end features including authentication (JWT sessions), global search, real-time notifications, and responsive UI; also built and deployed the product website.

Software Engineer

November 2023 – August 2025

DevFlowv

Lahore, Pakistan

Datability

- Designed and implemented a scalable onboarding flow in React TypeScript, integrating Google and Microsoft SSO for seamless authentication.
- Integrated Stripe for secure payment processing, ensuring a smooth subscription and transaction experience.
- Leveraged a serverless architecture to enhance scalability and security, reducing maintenance overhead.
- Optimized GraphQL queries and mutations, significantly improving API efficiency and reducing response times by 40%.
- Used Redux Saga to handle complex asynchronous operations, ensuring smooth state management and data consistency.

CYBERNETIQ - CLAW

- Worked on high-performance security tools that analyze network traffic, log data, and protocols.
- Developed PHP parsers for Cisco and Fortinet firewall configurations, extracting interfaces, rules, addresses etc. and structuring them for analysis.
- Stored firewall data in Neo4j, enabling efficient querying and visualization of complex network relationships in graph format.
- Built Flask APIs to expose parsed firewall data, enabling seamless frontend integration and faster analysis workflows.
- Integrated parsed data into the frontend using Parse Cloud functions and Redux Observable, ensuring seamless data flow across the application.
- Integrated firewall data with Three.js, visualizing network rules as interactive graphs.
- Developed Python-based parsers for switch configuration files, automating data extraction and transformation.

Software Engineer

April 2023 – October 2023

iTitans

Lahore, Pakistan

- Developed responsive frontend interfaces using React, focusing on reusable components and maintainable styling architecture.
- Built and integrated automation workflows using n8n, Make.com, and GoHighLevel, streamlining data processing and reducing manual intervention.
- Implemented data transformation pipelines to process and route incoming data efficiently across systems, improving reliability and reducing errors.

EDUCATION

Information Technology University

Lahore, Pakistan

Bachelor of Science, Computer Science

September 2019 – July 2023

PROJECTS

MyDiary – Digital Journal for Kids | *Next.js, Prisma*

- Built a multi-role journaling platform with parent analytics and habit tracking, featuring structured activity systems and role-based data access.

Realistic Traffic Simulation Using OSM | *Python, OSMNX, Matplotlib, DCEL* Oct 2022 – Aug 2023

- Final Year Project shortlisted for National Grassroot ICT Research Initiative (NGIRI) 2022-23.

Property Price Analysis | *Python, GeoPandas, Shapely, Matplotlib*

- Analyzed spatial factors affecting property values in Pakistan using geospatial data and visualization techniques.

Online Store – E-Commerce Website | *React, MUI*

- Developed a responsive e-commerce frontend with reusable UI components and optimized user experience.

Portfolio Website | *Next.js, Tailwind*

- Designed and deployed a personal portfolio showcasing projects and technical skills with modern UI/UX practices.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, Redux, Material UI

Backend: Node.js, Express, Flask, REST, GraphQL

Databases: PostgreSQL, MySQL, Neo4j

AI/LLM Integration: MCP, AI Assistants, Tool-based orchestration

Tools & Technologies: Docker, Stripe, Git, Parse, Prisma
