EXPERIENCE

Software Engineer

November 2023 – Present

DevFlowv

Lahore, Pakistan

Datability

- Designed and implemented a scalable onboarding flow in React TypeScript, integrating Google and Microsoft SSO for seamless authentication.
- Integrated Stripe for secure payment processing, ensuring a smooth subscription and transaction experience.
- Leveraged a serverless architecture to enhance scalability and security, reducing maintenance overhead.
- Optimized GraphQL queries and mutations, significantly improving API efficiency and reducing response times by 40%.
- Used Redux Saga to handle complex asynchronous operations, ensuring smooth state management and data consistency.

CYBERNETIQ - CLAW

- Worked on high-performance security tools that analyze network traffic, log data, and protocols.
- Developed PHP parsers for Cisco and Fortinet firewall configurations, extracting interfaces, rules, addresses etc. and structuring them for analysis.
- Stored firewall data in Neo4j, enabling efficient querying and visualization of complex network relationships in graph format.
- Built Flask APIs to expose parsed data, providing seamless integration with frontend systems.
- Integrated parsed data into the frontend using Parse Cloud functions and Redux Observables, ensuring seamless data flow across the application.
- Integrated firewall data with Three.js, visualizing network rules as interactive graphs.
- Developed Python-based parsers for switch configuration files, automating data extraction and transformation.

Software Engineer

April 2023 – October 2023

iTitans

Lahore, Pakistan

- Curated SEO optimized content, ensuring keyword-rich copy that enhances search engine visibility and drives organic traffic.
- Designed interactive and responsive interfaces with a focus on improving user experience
- Developed front-end of application by building reusable components, ensuring cross-browser compatibility with clean, maintainable CSS.

EDUCATION

Information Technology University

Lahore, Pakistan

Bachelor of Science, Computer Science

September 2019 – July 2023

PROJECTS

Realistic Traffic Simulation Using OSM | *Python, OSMNX, Matplotlib, DCEL* October 2022 – August 2023

- Final Year Project shortlisted for National Grassroot ICT Research Initiative (NGIRI) 2022-23

Property Price Analysis | *Python: osmnx, numpy, geopandas, matplotlib, shapely, seaborn, contextily*

- A Spatial Data Science approach to understanding the factors that affect property values in Pakistan

Online Store – E-Commerce Website | *React, MUI*

Portfolio Website | *Next Js, Tailwind*

TECHNICAL SKILLS

Frontend: HTML/CSS, Material-UI, JavaScript, ES6, ReactJs, Redux, Typescript

Backend: Node.js, Express.js, Flask, REST APIs, Parse

Databases: MySQL, PostgreSQL, Neo4j

Tools & Technologies: Git/GitHub, Stripe, Docker, VS Code, Visual Studio, PyCharm, Anaconda Jupyter
